Epson SureColor F2100

Direct-To-Garment Printer

Printer Overview

The Epson SureColor F2100 series available at Equipment Zone is a 5-color Direct-To-Garment printer. The printer uses pre-filled ink cartridges made with Ultrachrome® DG inks. With the revolutionary EPSON PrecisionCore® TFP® Print Head, the F2100 is capable of handling high production speeds with alluring print quality. The F2100 requires little maintenance and is highly reliable. It's the perfect garment printer for those looking for excellent print quality, easy maintenance routines & outstanding build quality and overall reliability!

**Engineered for Business. User-Friendly.
Superb Quality With Total Reliability**

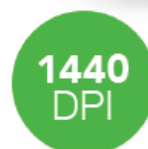

UltraChrome® DG Ink

Epson's UltraChrome® DG Ink cartridges are made with high quality ink to assure you get the best print possible. They're available in 250ml & 600ml cartridges. When using Epson's UltraChrome® DG Ink, the F2100 applies the perfect amount of ink to get an amazing print. Colors are more vibrant and whites are truer.

SpeedTreater-TX

The #1 Automatic Pretreater

Revolutionary Pretreating

The SpeedTreater-TX Automatic Pretreater is the perfect quick solution to pretreating garments. With an adjustable 17" x 22" maximum pretreat area, you can pretreat garments with a precise, even coat. By using a professional pretreating machine, getting higher quality prints with longer lasting color occurs. Also, the SpeedTreater-TX saves you money by not using excess pretreatment. With easy daily maintenance, the SpeedTreater-TX is the perfect addition to combine with any D-T-G printer! To increase production, save money and to pretreat garments better, the SpeedTreater-TX is the perfect solution!

Save Time

Quickly pretreat shirts with the push of a button with the SpeedTreater-TX. Simply place the shirt on the bed, select the size of the pretreat area, and push the green button. Get a smooth even layer of pretreatment applied to your garment!

Save Money

Conserving resources is important when printing D-T-G. The SpeedTreater-TX uses the perfect amount of pretreatment on every garment. This assures you get the most out of every bottle of pretreat liquid.

Features & Benefits

- Compatible with all brands of pretreatment
- Pretreat dark and light colored garments
- Large capacity 17" x 22" maximum pretreat area
- Saves time & money with a faster pretreating method and conserves pretreatment without wasting it
- Get higher quality, longer lasting prints
- Easy daily maintenance
- All electric. No air compressor required
- Powder coated, rustproof, all steel construction
- Available only at Equipment Zone!

The Ultimate Production Combo!

The Epson F2100 D-T-G Printer & The SpeedTreater-TX Automatic Pretreater

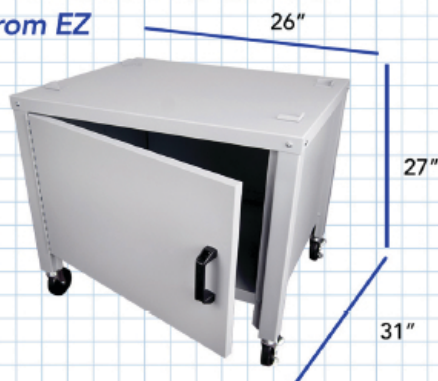

The Epson F2100 and the SpeedTreater-TX make the perfect production setup. When using the SpeedTreater-TX pretreater with the Epson F2100 you will be able to increase overall production rates, get higher quality prints on garments, and conserve pretreatment. Overall, you will be saving lots of time and money while getting the best quality print possible. These two great machines are perfect together!
